THEY COMBINE ADVANTAGES
of MACHINED PART and MOLDED PART. Stable, smooth, durable, easily installed, easily modified by turning, boring, milling, etc., the C12S25S is suitable for ¼" pitch charts and most universal applications. Has no burrs, flash or sharp edges to harm or deflect driven material. Tooth section (10 or 12 teeth) molded over aluminum body.
Result: A HIGH QUALITY PART AT VERY REASONABLE PRICE.
